Working Principle

The cheap twin tub washing machine working principle of the wave wheel washing machine is that the motor drives the wave wheel to rotate through the belt deceleration, and the timer or computer controls the wave wheel to stir the water, detergent and clothes. The washed clothes, under the mechanical action of the wave wheel rotation and the chemical action of the detergent water solution, knead the clothes through the positive and reverse reciprocating stirring and rubbing in the washing bucket to achieve the purpose of removing stains and washing clothes.

Attention

1. Don't set cheap twin tub washing machine in a bathroom or a place where rain comes in easily and it becomes wet.
2. Don't touch the clothes in cheap twin tub washing machine with you hands before the machine completely stops.
3. Choose the correct power, otherwise it may cause fire or electricity strike.
4. Your should pull out the plug when you are away from home for a long time or after using the item. Also, don't pull out the plug by wet hand to avoid the electric stroke.
