Product Size:	830*470*960mm
Packing Size:	850*500*985mm
N.W./G.W.:	25.0/28.0 KG
MOQ/40HQ Container:	154 PCS

Working Principle

The lower price top loading washing machine working principle of the wave wheel washing machine is that the motor drives the wave wheel to rotate through the belt deceleration, and the timer or computer controls the wave wheel to stir the water, detergent and clothes. The washed clothes, under the mechanical action of the wave wheel rotation and the chemical action of the detergent water solution, knead the clothes through the positive and reverse reciprocating stirring and rubbing in the washing bucket to achieve the purpose of removing stains and washing clothes.

Product Features

1. All of lower price top loading washing machine products adopt whole dynthetic resin PP style with novel design.
2. lower price top loading washing machine has the advantages of low price, simple structure, convenient operation and easy to move.
